

Working Together

Dedicated to making every IT project a success

Just when you think you have all of your IT jobs under control,
another gets added or a business-critical crisis interrupts.

Huon IT's Systems Integration team can help you get
your special IT obligations underway, fast.

Your IT Projects Partner

A dedicated projects division, dedicated to you

Huon IT is an IT consultancy firm with around 30 years experience supporting Australian business. Our dedicated projects division consists of hand-picked specialist IT consultants, who work closely with in-house IT to deliver technology implementations of various shapes and sizes.

This expertise combined with strong project management methodologies, a core focus on value and the support of leading technology vendors, ensures every project Huon IT delivers is a success.

Huon IT's Project Specialists can assist you with:

- Virtualisation
- IT infrastructure refreshes
- Critical application upgrades
- Networking - WAN & LAN
- Disaster recovery
- VDI deployments
- Workstation fleet upgrade
- Data storage
- IT security
- Complex infrastructure relocations
- Cloud migration
- Archival and backup projects
- Document management
- VoIP implementation
- Pilots and POCs ...and much more!

"We had been advised by the vendor that we had to buy additional hardware immediately or we would run out of space. This would have come at a considerable cost, and some of it would not have been compatible with newer models when we upgrade in the future.

Huon IT immediately questioned whether it was the best direction to take. They deployed a Storage Specialist to review our system, and came back to us with a plan the very next day.

By performing a few best practice reconfigurations, Huon IT freed up 1TB of storage which we expect will allow for another 6 months of data growth. We now have time to approach the upgrade strategically and select a long term solution for our future.

Not only were the Huon team a pleasure to deal with, but proved they are trustworthy and genuinely put their client's best interests ahead of a quick sale. Thank you Huon IT!"

Hilmy Abdic, IT Manager - Cornwall Stodart

Key technology partnerships:

See a solution not listed here?
These are just some of the common solutions in Huon IT's
ever-expanding portfolio, so please ask!

Phase 1: 'big picture' planning

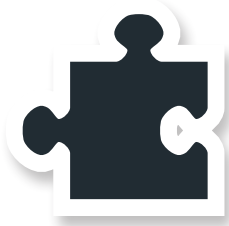

Discovery and infrastructure review – You know your system like the back of your hand, but a second set of eyes is healthy. We can identify areas that need addressing and provide recommendations based on your true needs.

Consultative approach – Working with you, we will help prioritise and map out initiatives structured around your current and future IT needs to chart out your technology roadmap.

Build a Business Case – Your company's leadership team have to understand how IT projects affect the bottom line before they support them. We will help you develop and present the rationale behind the IT enhancements – from total cost of ownership (TCO) to return on investment (ROI), and all the need-to-know facts in between.

Phase 2: design & scoping

Scope of Work – We will discuss solution options with you to identify exactly what roles and resources, people power, and funds are needed to meet your objectives.

Design – Our systems architects will design a project blueprint to guide the project from beginning to end including a master delivery plan; system architecture; network design; configuration guides; resource allocation; backup and disaster recovery; alerts and monitoring; third party vendors and support contracts.

Integrity – Your goals become our goals when you partner with Huon IT, and you are assured a completely transparent relationship. Realistic objectives and clear expectations sets the foundation to a successful project.

Phase 3: implementation

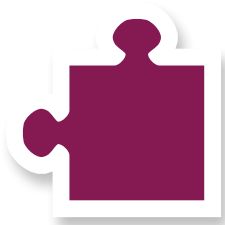

Flexible involvement – Our role can be completely hands-on, advisory only or anything in between. We have multiple tiers of consultants so you can utilise the skill sets you need at the most economical rate. The choice is yours with full cooperation on hand.

Change, Impact & Risk – All project deliveries are carried out with maximum care and minimal risk. Any required downtime is carefully planned with you, and any out of hours works are performed at no extra charge.

Empowerment, Training & Handover – Working side-by-side with you, we share all information along the way. And as the project wraps up, a key focus is to ensure that the solution will continue delivering on its promises into the future. Whether you enlist Huon IT's Managed Services, or choose to manage it in-house, we make certain that you have all skills and support mechanisms in place.

Ongoing: project management

Project management – At every step, the projects team is focused on ensuring milestones are met on time and on budget. Your project will be assigned a dedicated Project Coordinator who keeps a finger on the pulse at all times and will act as a point of contact for all third parties.

PMO – Internally, our senior management also take a hands-on approach. Huon IT's Project Management Office (PMO) is a team comprising of our Project Coordinator, Office Manager, CEO & Technical Director, who direct a Project Controls Framework that ensures the highest quality of management through out the project life cycle.

Communication is key – Your involvement and say in the project is crucial, so regular meetings are conducted to keep communication channels open with full transparency and progressive reporting. You will know why, when and what is happening at all times.

"We wanted an IT solution that was big enough to be reputable, but small enough to assist an on-the-go team. Huon IT was a strong strategic fit for us."

Nick Kuys, GM of Operations - DUET Group

Huon IT service principles

We empower in-house IT staff at all levels of skills and experience – from generalists, to technicians, to managers.

We provide complete transparency in everything we do and will provide real-time instruction as we assist you on your projects, to strengthen your skills if needed.

Who is on your projects team?

Huon IT's dedicated projects team has a wealth of experience planning, managing and designing projects. Our consultants average over 10 years experience each, dispensing exceptional technical know-how to help you confidently succeed with any project, on any scale.

Dedicated to your project will be:

Team Leader/Project Manager – an experienced senior consultant with years of experience across both technical delivery and project management, to holistically oversee the project from start to finish.

IT Consultants – a mix of mid to senior IT consultants to deliver the project.

Project Coordinator – an experienced project administrator to liaise with third parties, conduct meetings and assist the team to deliver the project on time and on budget.

What do our clients say?

Huon IT is extremely proud to service a number of high profile organisations across Australia, applying industry specific knowledge to each:

"I'd absolutely recommend Huon IT to anyone. Their expertise and support is superb, and they have great technical knowledge. I always knew what was happening, what was needed, and why - it is just a great experience working with them."

Brad Allen, IT Director - McCabe Curwood

"Other companies might have wanted to keep their knowledge to themselves, but Huon IT shared it and trained our IT staff. Now our IT manager has a new lease on life. It's good to see him step into his role as a senior manager."

Mark Broadhead, Chief Financial Officer - RSL LifeCare

"Huon IT's health check was exactly what we needed. Even more diverse than expected, they analysed everything from our IT infrastructure, disaster resilience, through to the dollars and cents of our supplier contracts and overheads. The results were a real eye opener."

Leon Allen, Managing Partner - Davies Collison Cave
